*The Newsletter of
Kendal Mountain Rescue
Team*

The Mintcake

Incorporating Ecake, the electronic Newsletter for the Kendal Mountain Rescue Team.

Editors Comments

Firstly, I would like to start this months newsletter by apologizing to all readers for the late publication of this edition. This was due to circumstances beyond my control, but I will try to ensure it does not happen again.

One of the reasons for the late delivery of the newsletter is the severe shock suffered at the hands of the new BBC comedy "Rockface". Whilst it does present the viewer with a reasonably entertaining program it also does much to give people the wrong impression. The reality, as we all are aware, is much different, and I for one are disappointed not to see any short, good looking newsletter editors figuring in the episodes. COME ON BBC.

The one upside is that for the first time ever in the history of Mintcake I have been provided with the excuse of including "pin ups" in the newsletter. So here they are. Suggestions please if they remind you of anyone.

Enjoy this months offering, and to use a quote "see you on the edge".

Thanks

Halfords have donated a torque wrench for use when anyone changes the wheels on the Land Rovers. The correct setting is 210 Nm. The wrench should normally be left on that setting. Many thanks to the Manager of Halfords Kendal Branch.

Dates for the Diary

Equipment and Medical Working group

24th April
29th May
26th June

WANTED

As you might of noticed this edition of the newsletter is very brief. I can

only print what you send me, and need articles for the next letter. You can send me articles at my home address. Pop them in my pigeon hole at base or email me at Phillatham1@netscapeonline.co.uk.
